# Quick start T UC-One Communicator for Mac OS

## T UC-One (Mac OS) – Application Installation

1. Download client software for Mac OS.
2. Install the application on your computer.
3. Start the application.

## T UC-One user settings

1. Enter server address: „<https://centrex.gts.cz/bc/pc>“.
2. Enter user phone number.  
your password received from T-mobile.
3. Log in.

During the first login please confirm the access to MS Outlook. This allows you to have your contacts available and if you have a meeting scheduled, your presence status changes to “at a meeting”. Please also, at your discretion, give permission to send information about your location that your colleagues will see.

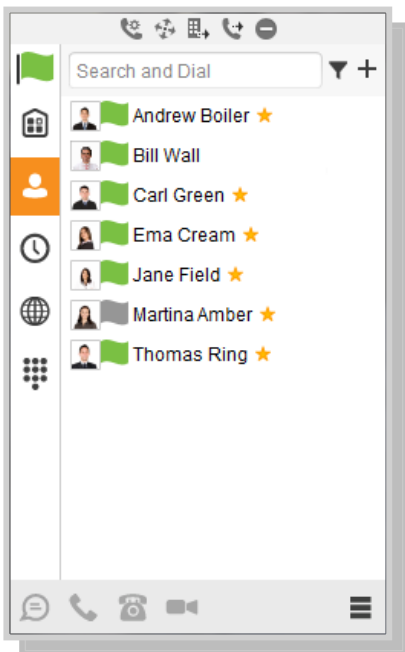

## Add Internal Contacts

1. Enter part of the name into the search field.

2. Click on the icon Add Contacts.

## Calling using T UC-One

1. Click on keyboard icon next to the search field.

2. Dial the number the same way as using desp phone (short number or external number – with or without 0).

## Making a Call from Phone, Calling from Computer Video Call or Chat

1. Select required contact.
2. Click below on desired function.
